516 Village Rd
Leland, NC 28451

Mission Statement

H2GO is committed to assuring a quality of life for our valued customers by providing the highest levels of water and sanitary sewer services, from Source to Stream, in a safe and efficient manner.

As professional service providers, H2GO in cooperation with its community partners will comprehensively plan, develop, maintain and operate the District's utility systems in a customer service oriented and cost-effective manner.

As the weather starts to get cold outside, water can freeze and expand. This expansion can be detrimental to your irrigation system if it expands and cracks your pipes. A leak in your irrigation system can lead to increased rates! H2GO always has our customers best interest in mind, so we would like to offer some tips and tricks on preventing this from happening.

The best method to prevent this from happening is:

- ⇒ Turn off the water to the irrigation system at main valve.
- ⇒ Turn on each of the valves to release pressure in the pipes.
- ⇒ Drain all of the water out of any irrigation components that might freeze.
